

**Amendments to the Specification:**

[0003] Such pressure sensitive adhesive tapes are used for picking up undesired particles from fabric, floor and other surfaces. More specifically, the pressure sensitive adhesive tape roll is provided with an adhesive formulated in such a way to efficiently pick up and hold foreign particles over which it is rolled and then optionally cleaned either by rinsing the particles away from the adhesive or peeling the soiled outermost layer away using one of the peeling systems in the art.

[0009] ~~In another aspect~~ The present invention is a cleaning apparatus including a cleaning element, support means for carrying the cleaning element, and a handle coupled to the cleaning element support. In one aspect, the support includes a handle and a spindle axially fixedly extending from the handle, a rotatable member rotatably mounted on the spindle, the cleaning element mounted on the rotatable member.

[0112] Referring now to Figs. 25 and 26, there is depicted another mat or pad 690 mountable on the one of the spindles of the present invention. The pad 690 includes a plurality of larger conical shaped projections 692, each terminating in a small nib 694, by example only. The conical shaped projection 692 are somewhat randomly spaced about a substrate 696 with which they form a homogeneous body. The substrate 696 may be formed as a continuous, closed cylindrical member, or as shown in Figs. ~~FA, FB and FC~~ 26, 27, and 28, as a sheet which wrapped around a tubular or cylindrical core 698. Opposed ends 700 and 702 of the sheet 696 are complementary shaped to inverted angled edges 704 and 706 in a longitudinally extending discontinuity in the core 698 so as to mount the ends of the substrate 696 in the core 698 in a snap-fit. In this aspect, a thin rib 708 extends from the core 698 intermediate the inward facing edges 704 and 706 to separate the ends of the substrate 696 as shown in Figs. 25 and 26.

[0013] ~~Another~~ In another aspect, the cleaning element is a mat having an exterior surface formed with cleaning members. The cleaning members may include a plurality of bristles extending from the mat. The bristles may also be saw-toothed shaped projections arranged with alternating peaks and valleys.

[0018]        ~~Another~~ In another aspect, the cleaning apparatus includes a cleaning element, support means for supporting the cleaning element, and a handle rotatably coupled to the cleaning element support. The cleaning element including a sheet disposed about the support.

[0118]        ~~Refer~~ Referring now to Fig. 31, there is depicted yet another pad 760 which is depicted, by way of example only, as being mounted on a modified core 736. In this aspect, the core 736 defines a substantially continuous cylindrical body.
